

APICS (ASCM) - CSCP

APICS- The Association of Operation Management. APICS programmes are industry education and certification programme created to meet the rapidly changing needs of the supply chain management field. APICS means the Association of Process Improvement and Continuous Success. It's one of the most respected certifications in supply chain internationally.

CSCP- Certified Supply Chain Professional

The mission of the CSCP programme is to educate individuals on the concepts, tools, terminology, and integration of topics across Supply Chain functions. The CSCP programme is designed to test candidate's in-depth knowledge of a variety of subjects specific to Supply Chain Management. APICS means Association of Process Improvement and Continuous Success.

The new APICS CSCP exam consists of three important modules. The 2012 exam reflects critical changes in the marketplace and in the evolving roles and responsibilities of operations and supply chain managers. For accreditation, you must master each of the following:

CSCP: MODULE 1

APICS Supply Chain Management Fundamentals

- **MODULE 1**
APICS Supply Chain Management Fundamentals
- Broad concepts include primary processes, objectives, logistics, integration methods, and rewards
- Alignment of supply chain with corporate strategies
- Key considerations for planning, inventory control, and continued improvement
- Identification and management of market segments
- Demand forecasting and effective management techniques
- Effective customer relationship management (CRM)

CSCP: MODULE 2

Supply Chain Strategy, Design, and Compliance

- Sustainability practices in design and operation
- Measurement, responsiveness, operations, and communications
- Risk, its sources, impacts, and mitigation methods
- Globally dispersed supply and demand, and the effects on logistics
- Factors influencing demand, including design, marketing, selling, and matching customer orders
- Core Customer Relationship Management (CRM) concepts, including strategies, technologies, and implementation challenges
- Fundamentals of supplier relationship management (SRM), including strategies, improved source management, relevant technologies, and measurement
- Inventory planning and control methods

CSCP: MODULE 3

Implementation and Operations

- Supply chain dynamics and the balance of responsiveness and efficiency
- Managing supply from internal and external sources
- Implementation of demand plans, including prioritization, fulfillment, and capturing and communicating point-of-sale data
- Tools and techniques to support continuous improvement
